# FROM BELGIUM WITH LOVE

Tasty waffles and chocolates, prepared with love – these are Belgium's claims to fame. Right? Well, that's not all. For some years now, Belgium has also been famous for trendy luminaires. Our mission as a luminaire manufacturer is to provide such trendsetting lighting systems to discerning customers, helping them to create sophisticated spaces, provide better light, and improve their quality of life. And we do it with a healthy dose of passion. Thanks to their modern designs, our luminaires not only look dazzling on the outside, they also have special qualities inside: the latest generation of LEDs. LEDs save both space and energy, making them a perfect solution for today's world.

We find our source of inspiration in the needs of our customers. This approach demands and encourages our full creative energy. Our luminaires contain innovative technological features as well as time-tested materials and methods. We won't turn the world inside out – but we might turn it on its head a bit. We boldly and enthusiastically dive into new challenges, and hope that we can capture your imagination as well.

Welcome to our world.

*La Belgique est connue pour ses gaufres et son chocolat, délicieux et préparés avec amour. Mais est-ce bien tout? Pas tout à fait. Depuis quelque temps, la Belgique s'impose également sur la scène de l'éclairage moderne. En tant que fabricant d'éclairage, notre mission est d'intégrer cet esprit d'avant-garde aux espaces urbains, leur assurant une meilleure luminosité, aux clients les plus exigeants, et pour une meilleure qualité de vie. Le tout étayé d'une bonne dose de passion. De leurs designs modernes, nos lampes sont non seulement éblouissantes, mais possèdent également des richesses intérieures bien spéciales: des LED nouvelle génération. Peu encombrantes, elles contribuent à la protection des ressources naturelles, s'inscrivant ainsi parfaitement dans l'air du temps.*

*Nous puons notre inspiration dans les différents besoins de nos clients. Ils défient et encouragent notre créativité. Nos lampes intègrent à la fois des innovations technologiques et des principes éprouvés. Nous n'avons pas la prétention de transformer le monde - mais peut-être de le chambouler un peu. Avec courage et enthousiasme, nous nous attaquons à de nouveaux défis et espérons vous entraîner avec nous.*

*Köstliche und mit Liebe zubereitete Waffeln und Schokolade – dafür ist Belgien berühmt. Stimmt? Nicht ganz. Seit einiger Zeit steht Belgien auch für trendige Leuchten. Genau solche Trendsetter für urbane Räume, für besseres Licht, für Menschen mit Ansprüchen und für noch mehr Lebensqualität anzubieten – das ist unsere Mission als Leuchtenhersteller. Und zwar mit einer gehörigen Portion Leidenschaft. Dank ihres modernen Designs sehen unsere Leuchten aber nicht nur blendend aus, sondern haben auch besondere innere Werte: LEDs der jüngsten Generation. Das spart Platz und schont Ressourcen. Passt also perfekt in die heutige Zeit.*

*Unsere Inspirationsquelle sind die Bedürfnisse unserer Kunden. Das fordert und fördert unsere ganze Kreativität. Technologische Innovationen finden sich in unseren Leuchten genauso wie Bewährtes. Wir werden die Welt nicht umkrepeln – aber vielleicht ein wenig auf den Kopf stellen. Mit Mut und Begeisterung stürzen wir uns in neue Herausforderungen und hoffen dich mitreißen zu können.*

*Willkommen in unserer Welt.*

*Bienvenue dans notre monde.*

**CREATIVITEIT**  
creativity, créativité

Every story needs a starting point. Ours began in the early 80's, when a handful of young Belgians decided to start a lighting company. So far, so good. But what name should they give to this new company? This is an issue in Belgium, since it has several official languages, including Flemish and French. The founders of the company didn't want to choose one or the other, so there was only one option left: The name had to fit phonetically into both worlds. During their lively discussions on the topic, the young entrepreneurs then chanced upon a document that would play a decisive role in the company's history: a roadmap, as it were, that explained in five points how to be successful in life – through hard work, trust, and enthusiasm, combined with courage and the necessary dose of creativity. This is our foundation and it has been our company philosophy, from then until now.

Toute histoire naît quelque part. La nôtre commença au début des années 80, alors qu'une poignée de jeunes Belges décida de créer une entreprise d'éclairage. Jusque là, tout allait bien. Mais quel nom allaient-ils lui donner? En Belgique, on parle plusieurs langues officielles - flamand et français, entre autres - et les fondateurs de l'entreprise ne voulaient opter ni pour l'une, ni pour l'autre, une seule solution s'ouvrait à eux: le nom devait être phonétiquement acceptable dans les deux langues. Au cours d'un débat animé, un document qui devait tenir un rôle crucial dans l'histoire de l'entreprise tomba par hasard entre les mains de nos jeunes entrepreneurs: un guide expliquant en cinq points comment réussir dans la vie - par le travail, la confiance, l'enthousiasme, beaucoup de courage et une bonne dose de créativité. Nous en avons fait notre base et notre philosophie d'entreprise. Cela encore aujourd'hui.

Jede Geschichte braucht einen Anfang. Unsere beginnt in den frühen Achzigern, als eine Handvoll junger Belgier beschließt, eine Leuchtenfirma zu gründen. So weit so gut. Doch welchen Namen sollte das Unternehmen bekommen? Da in Belgien mehrere Amtssprachen – u.a. Flämisch und Französisch – gesprochen werden und sich die Firmengründer weder für die eine noch für die andere entscheiden wollten, blieb nur eine Möglichkeit übrig: Der Name sollte phonetisch in beiden Welten zuhause sein. Bei der lebhaften Diskussion fiel den Jungunternehmern dann zufällig ein Schriftstück in die Hände, das eine entscheidende Rolle in der Firmengeschichte übernehmen sollte: ein Leitfaden, der in fünf Punkten erklärt, wie man im Leben erfolgreich ist – durch harte Arbeit, Vertrauen, Begeisterung, gepaart mit Mut und einer gehörigen Portion Kreativität. Das ist unsere Basis und unsere Firmenphilosophie. Bis heute.

**WEVER & DUCRÉ**  
LIGHTING

LET THERE BE LIGHT

*Que la lumiere soit*

# WHAT A FEELING

## GET TURNED ON

Want to warm things up a bit at a candle-light dinner? We can't guarantee that sparks will fly between two people, but one thing we can do – and do really well – is to fill a room with cheerful light that can create just the right mood for romance. That's because we are one of the few lighting companies to offer 2200 K LEDs.

## THE RIGHT LIGHT FOR THE RIGHT MOOD

You want variety? So do we. We invite you to enjoy the variety that life offers, and adjust your lighting just the way you want it. Whether you like things cosy, neutral, or on the cool side – we have just what you need. The key lies in the colour temperature, which is measured in Kelvin (K). The lower this value, the warmer the perceived light. The higher the colour temperature, the cooler light appears. We offer you warm candlelight atmosphere (2200 K), classic living room light (2700 K), and cool clarity at 3000 K.

## GOOD TO KNOW

Another important parameter for light quality is the CRI (colour rendering index) that can lie between 0 and 100. It is an index of how natural colours appear when being exposed to artificial light. LEDs with a higher CRI reflect colours more naturally and more pleasingly to the human eye. Objects which are illuminated by LEDs with a CRI higher than 80, make the colours appear as if they were brightened by a natural source of light.

## FAIRE NAÎTRE L'ÉTINCELLE

*Un dîner aux chandelles devrait être l'occasion de frémir à l'unisson... Bien que nous ne puissions pas garantir la naissance d'une étincelle entre deux personnes, nous savons comment plonger avec talent une pièce banale dans un éclairage d'ambiance festif. En effet, nous sommes l'un des rares fournisseurs de LED de 2200 K.*

## L'ÉCLAIRAGE IDÉAL POUR L'ATMOSPHÈRE IDEALE

*Vous aimez la variété ? Nous aussi. Exploitez la richesse que la vie peut vous offrir, et agencez votre éclairage exactement comme vous le souhaitez. Convivial, plutôt neutre ou sobre, voire froid - nous avons exactement ce qu'il vous faut. L'élément de sélection le plus important est la température de couleur, mesurée en degrés Kelvin (K). Plus cette valeur est basse, plus l'éclairage donne une sensation de chaleur. Plus la température de couleur est élevée, plus l'éclairage apparaît froid. Nous proposons des atmosphères chaleureuses imitant la lumière des chandelles (2200 K), la luminosité classique d'une pièce de vie aux couleurs naturelles (2700 K) ou encore une clarté sobre de 3000 K.*

## BON À SAVOIR

*La qualité de la lumière dépend également de l'IRC (Colour Rendering Index = indice de rendu des couleurs), qui peut varier entre 0 et 100. Il s'agit de l'indice de l'état naturel des couleurs exposées à la lumière artificielle. Les LED à l'IRC élevé promettent des couleurs d'autant plus naturelles et agréables à l'œil humain. Les couleurs des objets éclairés par des LED à l'IRC de 80 et plus apparaissent comme baignés d'une source de lumière naturelle.*

## MACHT DICH RICHTIG AN

*Es soll bei einem Candle-Light-Dinner so richtig knistern? Wir können zwar nicht dafür sorgen, dass der Funke zwischen zwei Menschen überspringt, aber einen Raum in eine festliche und stimmungsvolle Beleuchtung tauchen, das können wir und zwar richtig gut. Wir sind nämlich einer der wenigen Leuchtenanbieter von LEDs mit 2200 K.*

## DAS RICHTIGE LICHT FÜR DIE RICHTIGE STIMMUNG

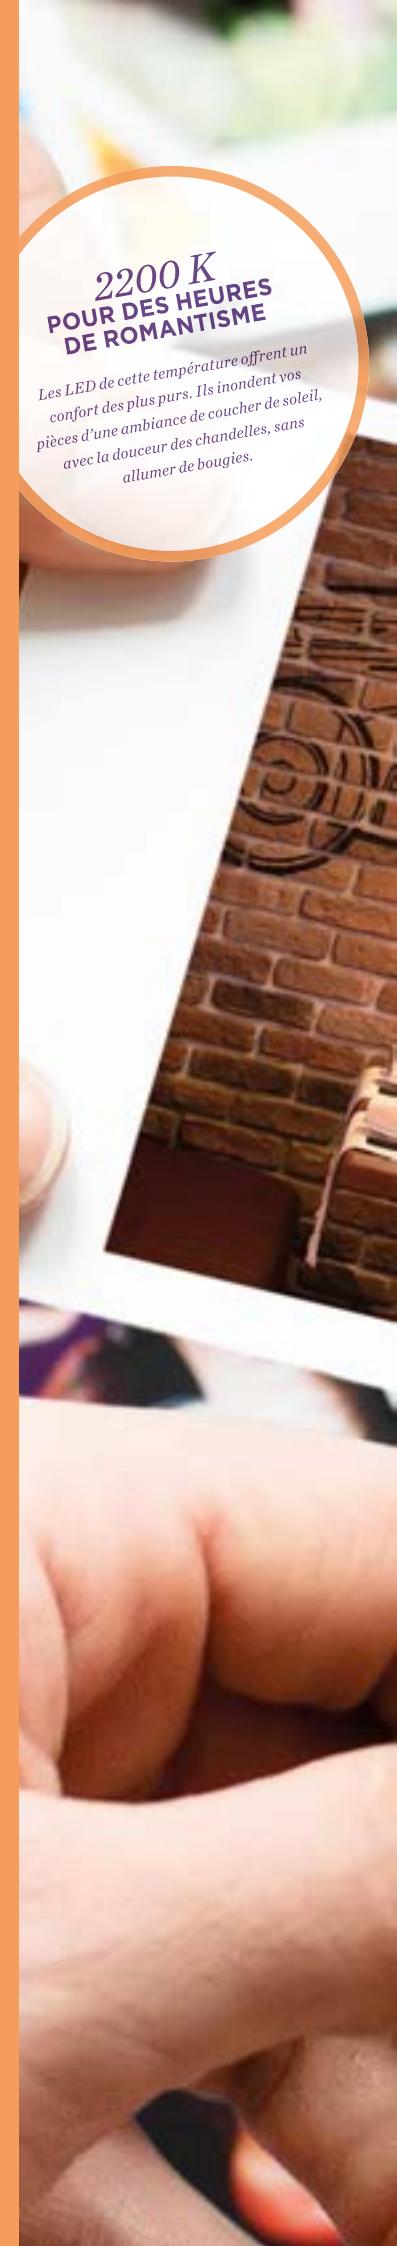

*Du stehst auf Abwechslung? Wir auch. Nutze also die Vielfalt, die dir das Leben bietet, und setze deine Leuchten genau so ein, wie du willst. Egal ob behaglich, eher neutral oder nüchtern, kühl - wir haben das Passende für dich. Das wichtigste Stellrad ist dabei die Farbtemperatur, die in Kelvin (K) gemessen wird. Je niedriger dieser Wert ist, desto wärmer empfindest du die Beleuchtung. Je höher die Farbtemperatur, desto kühler wirkt Licht. Wir bieten dir warme Candle-Light-Stimmung (2200 K), klassisches Wohnraumlicht (2700 K) und nüchterne Klarheit bei 3000 K.*

## GUT ZU WISSEN

*Wichtig für die Lichtqualität ist auch der CRI (Colour Rendering Index = Farbwiedergabewert), der zwischen 0 und 100 liegen kann. Er ist ein Index für die Natürlichkeit von Farben, die künstlichem Licht ausgesetzt sind. LEDs mit einem größeren CRI geben Farben umso natürlicher und angenehmer fürs menschliche Auge wieder. Gegenstände, die mit LEDs mit einem CRI ab 80 beleuchtet werden, lassen die Farben so wirken, als würden sie von einer natürlichen Lichtquelle bestrahlt werden.*

2200 K  
POUR DES HEURES  
DE ROMANTISME

Les LED de cette température offrent un confort des plus purs. Ils inondent vos pièces d'une ambiance de coucher de soleil, avec la douceur des chandelles, sans allumer de bougies.

## 2200 K FOR ROMANTIC MOMENTS

LEDs with this colour temperature stand for extreme cosiness. They create a sunset mood within your own four walls and provide a candlelight atmosphere without candles.

## 2200 K FÜR ROMANTISCHE STUNDEN

LEDs mit dieser Farbtemperatur stehen für pure Behaglichkeit. Sie sorgen für eine Sonnenuntergangsstimmung in den eigenen vier Wänden und für Kerzenlicht ganz ohne Kerzen.

## 2700 K POUR UN ÉCLAIRAGE DE SALON CLASSIQUE

Si vous aimez les températures de couleur plus froides, mais en souhaitant tout de même jouir d'une ambiance conviviale, les LED de 2700 K sont idéales. Elles constituent un éclairage classique et flexible, parfait dans toutes les pièces de votre maison, du séjour à la salle de bains en passant par la chambre à coucher.

## 2700 K KLASSISCHES WOHNRAUMLICHT

Wer etwas kühlere Farbtemperaturen mag und es trotzdem gemütlich haben will, sollte LEDs mit 2700 K den Vorzug geben. Sie stehen für klassisches Wohnraumlicht, das flexibel eingesetzt werden kann – vom Wohnzimmer über das Schlafzimmer bis hin zum Bad.

## 2700 K CLASSIC LIVING SPACE LIGHTING

Those who prefer cooler colour temperatures and still want to have it cosy should go for LEDs at 2700 K. They represent the classic living space lighting that is flexible and can be used in living rooms, bedrooms, and bathrooms alike.

## 3000 K NEW CLARITY

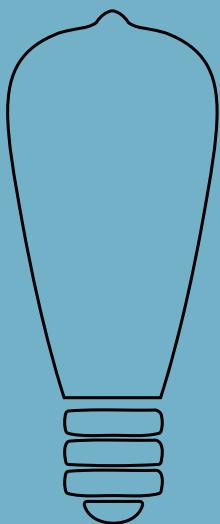

Are you somebody who prefers cosiness with a touch of cooler lighting? In this case the LEDs with this colour temperature are the perfect choice for you. They provide a pleasant balance between brightness and cosiness.

## 3000 K POUR UNE SOBRIETÉ NOUVELLE

Associez-vous plutôt le confort avec une luminosité plus claire? Si oui, les LED de cette température de couleur sont exactement ce qu'il vous faut: elles offrent un bel équilibre entre clarté et confort.

## 3000 K NEUE NÜCHTERNHET

Bist du jemand, der Gemütlichkeit mit etwas kälterem Licht bevorzugt? Dann sind LEDs mit dieser Farbtemperatur genau das Richtige für dich: Sie sorgen für eine angenehme Balance zwischen Klarheit und Gemütlichkeit.

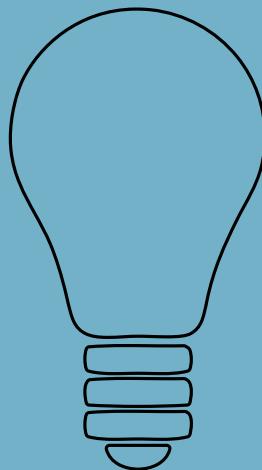

## CARBON FILAMENT 100 W

*THE ORIGINAL*

The carbon filament lamp, with its extremely warm light, began to replace the then-dominant gas light around 1880. This makes it the mother of all electric lamps – the undisputed original, which literally lit the way to the present.

*De par sa lumière extrêmement chaleureuse, l'ampoule à filament de carbone remplaça dès 1880 l'éclairage à gaz jusqu'alors utilisé. Elle est bel et bien la mère de toutes les lampes électriques - l'originale incontestée, dont la puissance lumineuse se perpétue littéralement aujourd'hui.*

*Mit ihrem extrem warmen Licht ersetzte die Kohlefadenlampe ab etwa 1880 das damals vorherrschende Gaslicht. Sie ist damit die Mutter aller elektrischen Lampen – das unumstrittene Original, dessen Strahlkraft im wahrsten Sinne des Wortes bis heute reicht.*

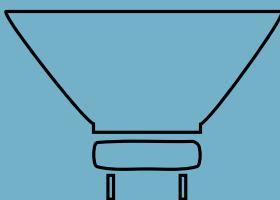

## INCANDESCENT LAMP 75 W

*THE CLASSIC*

Incandescent lamps are power guzzlers. Why? Because they convert only 5 % of the used energy quantity into light – the rest becomes heat. Thus, in 2012 – two years after the 130th birthday of the incandescent lamp – it was time to say goodbye: Incandescent lamps were removed from the market within the European Union.

*Les lampes à incandescence sont énergivores. Pourquoi ? Parce qu'elles ne convertissent efficacement que 5 % de l'énergie consommée en lumière et le reste en chaleur. 2012 - deux ans après le 130ème anniversaire de la lampe à incandescence, il était temps de s'en séparer : elle a donc été retirée du marché au sein de l'UE.*

*Glühlampen sind Stromfresser. Warum? Weil sie nur 5 % der eingesetzten Energiemenge tatsächlich in Licht umwandeln – der Rest ist Wärme. 2012 – zwei Jahre nach dem 130. Geburtstag der Glühlampe – hieß es daher Abschied nehmen: Sie wurde innerhalb der EU vom Markt genommen.*

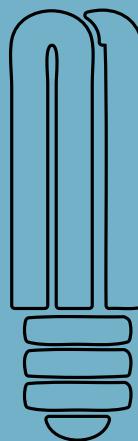

## HALOGEN 50 W

*THE SUCCESSOR*

The halogen lamp is a refinement of the classic incandescent lamp: version 2.0, so to speak. Despite the fact that it generates light in the same way, its halogen-filled bulb and an energy reflecting layer make it much more economical.

*La lampe halogène représente une évolution de la lampe à incandescence classique : la version 2.0 de la lampe classique, pour ainsi dire. Malgré un mode de production de lumière quelque peu similaire, elle fonctionne grâce à un piston rempli de gaz halogène et à une couche réfléchissante d'énergie, et est beaucoup plus économique.*

*Die Halogenlampe ist eine Weiterentwicklung der klassischen Glühlampe: Die 2.0-Version des Lampenklassikers also. Trotz gleicher Art der Lichterzeugung arbeitet sie dankhalogenangas gefüllter Kolben und einer energiereflektierenden Schicht aber viel wirtschaftlicher.*

## FLUORESCENT 28 W

*THE SECOND PLACE*

To put it plainly, the energy-saving lamp is an ecological disaster because nobody has yet found a way to properly dispose of the mercury contained in the long fluorescent tubes. Still its service life of 10,000 hours was by far the longest of all.

*Cette lampe à économie d'énergie est clairement étiquetée comme une catastrophe écologique, car le mercure contenu dans les tubes fluorescents ne peut pas, à ce jour, être éliminé sans danger. Cependant, elle a su convaincre jusqu'à présent par une durée de vie supérieure à la moyenne de 10 000 heures.*

*Drastisch ausgedrückt ist die Energiesparlampe ein ökologisches Desaster, denn das in längeren Leuchtstoffröhren enthaltene Quecksilber kann bisher nicht sachgemäß entsorgt werden. Aber dennoch überzeugte sie bisher durch ihre überdurchschnittlich hohe Lebensdauer von 10.000 Betriebsstunden.*

# LEDS SHINE SO BRIGHT

THE PERFORMER

Since the days of Edison, the good old incandescent lamp has put out more heat than light. But that's history now. Today, modern lighting systems are not only making our houses much more efficient, they are also sparing our pocketbooks. This is because an LED has a luminous efficacy 18 times greater than an incandescent lamp, and thanks to a directed light pattern, it is significantly easier to focus in different directions. Not to mention its durability: Once you buy an LED, it lasts a lifetime. This is why we at Wever & Ducré rely mainly on lighting with LEDs. Because we really want you to see the light.

*Depuis l'époque d'Edison, la bonne vieille ampoule à incandescence a bien plus chauffé qu'éclairé. Elle fait maintenant partie de l'histoire ancienne. Aujourd'hui, les sources de lumière modernes éclairent non seulement nos maisons plus efficacement, mais surtout elles ménagent nos comptes en banque. En effet, pensez-y: une LED contient 18 fois la puissance lumineuse d'une ampoule à incandescence, et, grâce à son rayonnement lumineux ciblé, elle est beaucoup plus flexible. Sans parler de sa longévité: achetez une LED, elle durera toute une vie. C'est pourquoi, chez Wever & Ducré, nous préférons utiliser les LED comme moyen d'éclairage. Pour que la lumière soit, vraiment!*

*Seit Edisons Zeiten hat die gute alte Glühbirne mehr eingeheizt als geleuchtet. Das ist nun Geschichte. Heute erhellen moderne Leuchtmittel nicht nur unsere Behausungen wesentlich effizienter, sondern schützen vor allem unser Konto. Denn merke: Eine LED hat die 18-fache Lichtausbeute der Glühbirne und ist dank gerichteter Lichtabstrahlung deutlich besser lenkbar. Von der Haltbarkeit ganz zu schweigen: Einmal gekauft, hält die LED ein Leben lang. Deshalb setzen wir bei Wever & Ducré mit einem Leuchtmittelanteil vorrangig auf LED. Damit dir wirklich ein Licht aufgeht.*

Thinking about the many advantages of LEDs almost takes one's breath away: extremely high energy efficiency, long operating life, no maintenance, environmentally friendly, progressively dimmable, compact, etc. etc. ... and if you think that we're just trying to influence you, don't be fooled. LEDs simply have a number of advantages, and they are the future. See for yourself.

*Pendant l'énumération des nombreux avantages des LED, le souffle nous manque: une efficacité énergétique exceptionnellement élevée, une longue durée de vie, entretien inutile, respect de l'environnement, à luminosité variable, aspect compact et bien plus encore... Vous auriez tort de penser que nous essayons de vous endoctriner! Les LED ont tout simplement de multiples atouts - elles incarnent l'avenir. Laissez-vous convaincre.*

*Zählt man die vielen Vorteile von LEDs auf, fällt Luftholen schwer: äußerst hohe Energieeffizienz, langlebig, wartungsfrei, umweltfreundlich, stufenlos dimmbar, kompakt und und und ... Falls du nun glaubst, wir versuchen dich zu beeinflussen, täuschst du dich. LEDs haben einfach viele Vorteile – sie sind die Zukunft. Überzeuge dich selbst.*

## GOOD TO KNOW

Up to 180 lm/W luminous efficacy  
1600-3000 K colour temperature  
50,000 hours operating life

Efficacité lumineuse : jusqu'à 180 lm/W

YOUR CHOICE

# TURN ME ON

WITH A TURN OF THE  
WRIST FROM 0 TO 100

IM HANDUMDREHEN  
VON 0 AUF 100

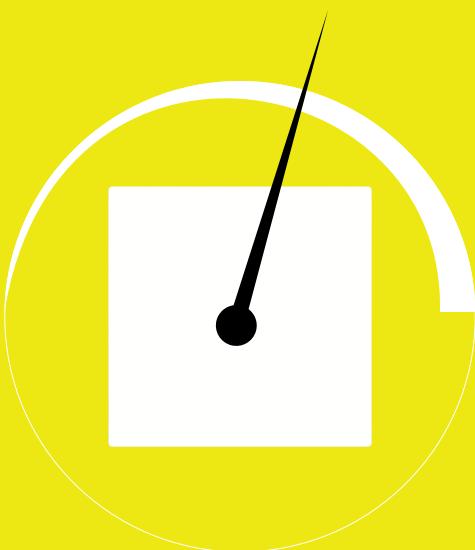

Let's get the party started – or will it be a cosy dinner with friends? No matter what your plans are, our lamp adapts to every situation. You can select any ambiance from candlelight romantic to full power with a phase control rotary dimmer. But that's not all! Thanks to its LED technology, it is extremely energy-efficient and long lasting. And it is easily dimmable with no additional installation effort.

DE 0 À 100 EN UN TOUR DE  
MAIN

*Que la fête commence! Ou peut-être préférez-vous plutôt un dîner agréable entre amis? Quelles que soient vos intentions, nos luminaires s'adaptent à chaque situation et veillent à créer l'atmosphère appropriée. L'utilisation d'un gradateur rotatif (en début de phase) vous garantit l'atmosphère parfaite en toutes circonstances et déploie sa pleine puissance de 0 à 100 en un clin d'œil. Mais ce n'est pas tout: grâce à sa technologie LED, il est vraiment très durable et extrêmement économique en termes d'énergie. La gradation de nos luminaires se fait très facilement et sans frais d'installation supplémentaires.*

*Let's get the party started oder doch lieber ein gemütliches Abendessen mit Freunden? Egal was du vorhast, unsere Leuchte passt sich jeder Situation an. Sie kann auch mittels Drehdimmer (Phasenanschnitt) immer für die richtige Atmosphäre sorgen und entfaltet im Handumdrehen von 0 auf 100 ihre ganze Power – ein echter Stimmungsmacher eben. Doch nicht nur das: Dank ihrer LED-Technologie ist sie extrem energiesparend und ein echter Dauerbrenner. Ganz einfach dimmbar ohne zusätzlichen Installationsaufwand.*

**DIM ME SO SOFTLY**  
*oh yeah.*

**LED IT GLOW**  
*from 0 up to 100.*

WEVER & DUCHÉ  
LILLE

ORDER  
BY  
2:30PM

FAST  
AS  
LIGHT

#### ALWAYS FAST DELIVERY

We're really fast, too. The dedication and love we put into the design and manufacture of our luminaires is also there when we bring them to you. That is why if we receive your order by 2:30 PM, subject to sales conditions, we can prepare your in-stock luminaires order for shipment the next day. We can't tell you how fast the courier who delivers them is going to be, but one thing we do know for sure:

They come fast and they come  
FROM BELGIUM WITH LOVE!

#### LIEFERUNG KOMMT PROMPT

*Wir sind tatsächlich flink. Denn mit derselben Hingabe und Liebe, mit der wir unsere Leuchten designen und fertigen, bringen wir sie auch zu dir. Deshalb: Erreicht uns deine Bestellung bis 14:30 Uhr, abhängig von den Verkaufsbedingungen, sind deine lagernden Leuchten am nächsten Tag abholbereit. Wie schnell der Kurier ist, der sie dir bringt, wissen wir nicht. Aber eines wissen wir mit Sicherheit:*

*Sie kommt prompt und sie kommt  
FROM BELGIUM WITH LOVE!*

#### LIVRAISON RAPIDE

*Nous vous offrons un service de livraison rapide. En effet, avec le même dévouement et la même passion que nous concevons et fabriquons nos lampes, de même nous vous les expédierons. Ainsi, passez votre commande avant 14h 30, et selon les conditions de vente applicables, toutes nos lampes en stock seront prêtes à l'enlèvement dès le lendemain. Difficile de prévoir la vitesse du coursier qui vous les apportera. Mais une chose est sûre:*

*votre commande vous parviendra rapidement, accompagnée de  
BONS BAISERS DE BELGIQUE!*

A photograph of a modern architectural space featuring floor-to-ceiling glass doors. The interior has light-colored walls and a wooden floor. Through the glass, a swimming pool and lush green hills under a clear blue sky are visible. The word "BISHOP" is overlaid in large, bold, black capital letters.

A photograph of a modern outdoor lounge area. In the foreground, a long white sofa with several light-colored pillows is positioned. Behind it, several black chairs with textured, ribbed backs are arranged. The background features a large glass wall that looks out onto a lush green garden. To the left, there are tall potted plants and a small lantern. The overall aesthetic is clean and contemporary.

A photograph of a modern, single-story house at dusk or night. The house has a light-colored, textured facade with a dark horizontal band near the roofline. A black-framed glass door is visible on the right side. The front entrance is highlighted by a set of three warm-toned wall-mounted lights. To the left of the entrance, there's a small garden area with a low wall made of large, light-colored stones, some green plants, and a small decorative object. In the foreground, a paved walkway leads towards the house, bordered by more rocks and low-lying plants. Bare trees stand in the background against a darkening sky.

A photograph of a lush tropical garden at night. The scene is filled with large green leaves from various plants and trees. Two tall, thin, rectangular light fixtures stand on the ground, illuminating the path and casting long shadows. The overall atmosphere is dark and serene.

What's that? A whole new product range, and already several project references? See it this way: Inspiration is key to success in lighting design, so what we care for most is inspiring you and showing you the potential of what we at Wever & Ducré do. Thus, we took the liberty of editing some original images to give you an impression of how our luminaires improve living, office, outdoor, and other spaces. These pictures are marked with an .

The details provided in this catalogue were correct at the time of publication. They do not constitute any kind of obligation on our part and are for information purposes only. We shall not be held liable for any discrepancies between the illustrations or descriptions given and the actual product. The power input of the LEDs is calculated without driver electronics and gear. We reserve the right to make alterations to our products at any time. All orders will be carried out in accordance with the relevant versions of our General Terms of Business and our Terms of Delivery. These can be viewed at [www.weverducre.com](http://www.weverducre.com).
